

PROTECT-GRIP®

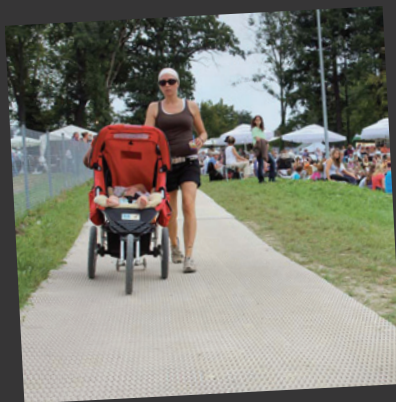

The ideal protection of subsurface against wear in any weather – short-term or permanent.

verreal
surface protect systems

PROTECT-GRIP® adapts to the natural subsurface and is therefore versatile in its uses as a permanent, temporary or even mobile ground protection.

Especially well-suited for barrier-free access to sand beaches, as permanent or temporary lawn protection and for the fortification of meadows, it is used for dike construction, for natural road surfaces and paths.

PROTECT-GRIP® provides extensive protection against burrowing animals, protection against erosion and stabilises the subsurface at the same time. PROTECT-GRIP® is available in three versions: light, strong and flex.

PROTECT-GRIP® light

PROTECT-GRIP® light reinforces and protects areas grass-covered against compacting under loads and against burrowing animals.

PROTECT-GRIP® light is particularly well-suited for:

- landscaping and gardening
- lawns and meadows
- swimming pool areas
- nature paths
- playgrounds
- protection against burrowing animals

PROTECT-GRIP® strong

PROTECT-GRIP® strong is very well-suited for higher loads like, for example, lawn parking lots, as access paths, for permanent as well as temporary use. The structure and material combination can accommodate high loads and distribute them over the surface area.

PROTECT-GRIP® strong is particularly well-suited for:

permanent ground protection

- golf courses, equestrian sports
- lawn parking lots
- natural tracks on grass/meadows
- bike and recreation parks
- dike construction and escarpments

temporary use

- accesses to event areas
- accesses for light vehicles
- open air trade fairs
- parking lot areas
- visitor paths

PROTECT-GRIP® flex

PROTECT-GRIP® flex provides safety against slipping and are comfortable for people and animals to walk on.

PROTECT-GRIP® flex is particularly well-suited for:

permanent ground protection

- barrier-free access to sandy beaches
- golf courses and equestrian sport facilities
- playgrounds
- protection against falling
- deck covers on boats
- boarding animals

temporary use

- mobile sandy beach mats
- event floors, accesses/paths
- barrier-free access paths
- ground protection at events
- open-air trade fairs

Technical specifications

	light	strong	flex
Width	2 m	2 m	2 m
Roll length	30 m = 1 PU	20 m = 1 PU	10 m = 1 PU
Area	60 m ²	40 m ²	
Thickness	4 mm	15 mm	13,5 mm
Weight	550 g/m ² - 33 kg/roll	2 kg/m ² - 80 kg/roll	550 g/m ² - 33 kg/roll
Structure	diamond shape	rippled	rippled
Tensile strength	approximately 5,9 kN/m	approximately 16 kN/m	approximately 12 kN/m
Drivability	light equipment & vehicles	up to approx. 8 ton axle load	light equipment & vehicles
